MUHAMMED IRSHAD M

Full Stack Developer | Python & Machine Learning Enthusiast
Areekode, Malappuram, Kerala 673639 | 8590709006 | irshadmm16@gmail.com | linkedin.com/in/irshad-m | Portfolio: irshadm.pythonanywhere.com

PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in full-stack web development, Python, and Machine Learning. Skilled in building and deploying end-to-end web applications using Django and Flask, developing REST APIs, and building machine learning models with TensorFlow and PyTorch. Experienced in database design, backend logic, and real-world application deployment, with a strong foundation in AI-driven and data-driven software solutions. Eager to contribute strong full-stack development, problem-solving, and analytical skills in a Full Stack Engineer role.

TECHNICAL SKILLS

Programming Languages: Python, C
Web Development: Django, Flask, HTML, CSS, REST API Development, SQLite
Machine Learning & Deep Learning: Scikit-learn, TensorFlow, Keras, CNN (VGG-16 Transfer Learning), ANN, Model Development & Optimization, Hyperparameter Tuning
Data Science & Analytics: Pandas, NumPy, Data Preprocessing, Feature Engineering, Exploratory Data Analysis
MLOps & Deployment Tools: MLflow (Experiment Tracking), DVC (Data Versioning), Git/GitHub, Flask (REST APIs), Streamlit (Web App Deployment)
Soft Skills: Leadership, Communication, Problem-Solving, Team Collaboration

EXPERIENCE

Python Developer Intern — Maxlore Innovations *August 2022*

- **Engineered** and deployed RESTful APIs using Flask, optimizing backend database queries to reduce average response.

PROJECTS

Kaalapani – eFootball Tournament Management Platform

- **Designed and developed** a full-stack web application using Django to manage a **knockout eFootball tournament**, featuring a live points table, bracket view (Round of 16 to Final), and top scorers leaderboard.
- **Built** database models and backend logic to schedule matches, calculate live standings, and generate randomized fixtures automatically.
- **Debugged** a data-binding issue between the backend and front-end templates, correcting a variable reference mismatch to ensure accurate live data rendering.

Chest Cancer Detection using Deep Learning

- **Architected and trained** a CNN model (VGG-16 transfer learning) on 300+ CT scan images, achieving **96% accuracy** in tumor detection — an 8-point improvement over an 88% baseline.
- **Reduced** false positive rate by **30%** through systematic hyperparameter tuning and data augmentation.

GitHub: github.com/irshadmuhammed/Chest-Cancer-DeepLearning

EDUCATION

- **B.Tech in Computer Science and Engineering — College of Engineering Trivandrum** *2023 – 2026*
- **Diploma in Computer Science — AKNM Polytechnic College, Thirurangadi** *2020 – 2023*

CERTIFICATIONS

- Complete Data Science, Machine Learning, Deep Learning & NLP Bootcamp — Udemy
- Programming in JAVA -- NPTEL

LANGUAGES

Malayalam (Fluent), English (Fluent)
